

WELL SCHOOLED.

DIVERSE PUBLIC OPTIONS ARE CLASS ACTS

South Bend Community School Corp. serves an exceptionally diverse population of 21,000 K-12 students. Some 3,500 employees contribute to the educational experience as teachers, administrators and support staff. With a budget of \$237 million to operate 34 school buildings and five support facilities in a geographic area covering 160 square miles, SBCSC is the fourth-largest school corporation in Indiana.

But the numbers, compelling as they are, tell only part of the story. While the sheer size and diversity of the South Bend Community School Corp. will inevitably present some challenges, there are also many features of South Bend schools — innovative programs, special awards, unique partnerships — that greatly enhance the quality of public education in our city.

TRADITIONAL OR SPECIALIZED PROGRAMS? PUBLIC OR PRIVATE? WHATEVER THE TYPE OF EDUCATIONAL OPPORTUNITY YOU SEEK FOR YOUR CHILDREN, SOUTH BEND HAS SOMETHING THAT'S JUST THE RIGHT FIT FOR YOU.

MAGNETIC FIELDS

Thirteen schools within the school corporation offer magnet programs that are designed to draw students from outside the normal geographic boundaries to study a specialized curriculum. (This includes four high schools and nine primary and intermediate magnet schools.) Each magnet program works in partnership with professionals from the business and college community to provide an enriching educational experience in a real-world setting.

Here's a closer look at key programs:

1. The International Baccalaureate magnet program at Adams High School offers a rigorous college-preparatory program, which includes learning a second language and understanding people from diverse cultures.
2. Students in the Visual and Performing Arts magnet program at Clay High School have the opportunity to engage with professionals in dance, drama, choral or instrumental music, and visual arts.
3. At Riley High School, the Technology and Engineering magnet program started with the idea of incorporating the use of computers and emerging technologies within a challenging, hands-on, standards-based curriculum. It also includes a component that provides for innovative science, technology, engineering and math education, including receiving college credit for certain courses.
4. In Washington High School's Medical and Allied Sciences program, students interested in the medical magnet program must enter as freshmen in order to fit in all the required coursework. In addition to a rigorous curriculum that includes advanced math and science coursework, students also take integrated health science classes and a raft of courses on ethics, professional practices and cultural diversity, as well as individual, family, community and world health issues. The demanding curriculum is designed to develop students' communication, problem-solving and critical-thinking skills.
5. and 6. The Fine Arts Academies at Perley Primary Academy (K-4) and Dickinson Intermediate (5-8) allow students greater arts opportunities than traditional programs. Teachers at the schools have written a supplemental guide integrating arts into the regular curriculum, so students can begin seeing connections among those subjects.
7. The Marquette Primary Montessori Academy is the first public Montessori school in St. Joseph County. The school worked closely with The Montessori Academy at Edison Lakes, a private school that offers a Montessori training center for early-childhood certification through Indiana University South Bend.

\$ spent per student (corporation-wide):	\$13,600
Total scholarships:	\$9.4 million awarded to the class of 2010
Magnet programs:	13
Number of Indiana Teachers of the Year:	6
Number of National Spelling Bee champions:	2

South Bend adds New Tech High School

As of 2011, South Bend students have had the opportunity to broaden their academic horizons at the New Tech High School, located in a wing of Riley High School.

Based on a national model, the school offers a learning environment in which students solve open-ended problems and complete projects in teams in a smaller high school setting.

SPECIAL PROGRAMS AND ACTIVITIES

8. Riley High School's Early College High School, located at 724 E. Dubail St. (www.sbcsc.k12.in.us/EarlyCollege), blends high school and college into one academically rigorous program. While in high school, students take college courses that can lead to up to two years of college credit. With a strong focus on students who are underrepresented in higher education, the goal of this model is to increase college enrollment, help students transition smoothly into college and reduce remediation. The program was implemented in 2009.

9. Each primary center (K-4) in the school system provides full-day kindergarten to offer students enhanced opportunities for academic preparation and social development. The program is offered in response to research showing that early childhood education gives an extra boost for growth and development in succeeding grades.

HIGH RANKINGS

10. Kennedy Primary Academy (K-4), one of two academies for highly capable students in the school system, has been designated a Four Star School by the Indiana Department of Education and is a National Blue Ribbon School of Excellence. These designations indicate that Kennedy is in the top 25 percent of all Indiana schools in attendance, and in language arts and math portions of Indiana Statewide

Testing for Educational Progress-Plus (ISTEP+), Indiana's standardized testing regimen for grades 3 through 10.

This is the second time Kennedy has earned the state designation.

11. LaSalle Intermediate Academy, Kennedy's grade-5-through-8 counterpart, is among the few public middle schools in Indiana to receive a distinguished Great Schools Rating of 10 out of 10, based on reviews and comments from parents.

WINNING WAYS

12. LaSalle also features a highly successful robotics team, which has been competitive on a statewide basis.

13. Students from John Adams High School have competed for 10 consecutive years in the State Mock Trial Championship, advancing to several Top 10 finishes in national competition. In 2009 and 2011, they were the National Champions.
